keybase.io/71

I started programming in middle school, where my skills allowed me to create a website that could help my classmates study for the upcoming exams.

Since then, I have started over 60 programming projects, most of them public, including multiple compilers and assemblers.

I have also contributed to more than a dozen open source projects in several different programming languages.

Furthermore, I have already had an internship in a French research laboratory, and I also strive to learn more about functional programming.

EXPERIENCE

○ LRDE Summer 2018

Introduced the new simplifying engine of Spot (C++ 14).

EDUCATION

○ EPITA 2017 -

Pursuing an computer engineering degree in the international section.

○ Lycée George de la Tour 2014 - 2017

Obtained the *Baccalauréat S* with *Bien* honors, and a perfect score in mathematics.

LANGUAGES

 French

Native French speaker.

 English

Fluent speaker with a score of 107/120 at the TOEFL IBT (2016).

PROGRAMMING

C# / F#

Advanced knowledge of the language, standard library, ecosystem and compilers.

JavaScript / Nim / Python / Rust

Advanced knowledge of the language, standard library and ecosystem.

C / C++ / Java / Haskell / Kotlin / OCaml

Advanced knowledge of the language, and intermediate knowledge of the standard library and ecosystem.

OTHER SKILLS

- Android, Linux, Nix, Windows
- Vim, VS Code, Android Studio
- Excel

OTHER CERTIFICATES

- French driving license
- French first aid certificate (PSC1)
